

Raphael Addiego, M.D.
Vitreoretinal Specialist

- Macular Degeneration
- Diabetic Retinopathy
- Flashes/Floaters
- Retinal Surgery
- Clinical Studies

“My vision is to make the greatest contribution I can to the quality of vision and lives of others, in providing dedicated service to those I am asked to help. Retinal surgery is a rapidly evolving field with new treatments for conditions that were untreatable only a few years ago. I want my patients to know that they will be able to benefit from these advances in retinal care. I also do my best to make sure that a patient leaves our office having all their questions answered and fully confident in the quality of care they have received.”

- Raphael Addiego, M.D.

excellence in eye care a tradition.”*

Specialty Eye Institute offers comprehensive eye care services in 10 locations throughout Michigan and Ohio. Treatments include diseases of the eye, cataracts, corneal disease, glaucoma, dry eyes, macular degeneration, diabetic eye care, blepharoplasty, and laser vision correction. For more information about Specialty Eye Institute, or to schedule an appointment, please call 1-877-852-8463 or visit www.specialtyeyeinstitute.com.

Carmelina M. Gordon, M.D.
Vitreoretinal Specialist

- Macular Degeneration
- Diabetic Retinopathy
- Flashers/Floaters
- Retinal Surgery
- Clinical Studies

“I know it is important to you that you receive the best possible care to correct or restore your vision along with a doctor who understands your concerns and who always puts your needs first. That is the kind of care you can expect from me and from my staff. My goal is that at the end of my journey, I have made this world a little better through my contributions to my patients’ lives and to the specialty of ophthalmology.”

- Carmelina M. Gordon, M.D.

SPECIALTY EYE
— INSTITUTE —

Carmelina M. Gordon, M.D.

Vitreoretinal Specialist

CERTIFICATION:

American Board of Ophthalmology

Dr. Gordon believes that new technology and treatments have the potential to improve the sight and lives of her patients. That is why she is involved in multiple studies and clinical trials including those that target new treatment in diabetic retinopathy, macular degeneration, retinal vein occlusion and uveitis. These clinical trials allow Dr. Gordon to offer cutting edge therapy to qualifying patients who may not have had access to these treatments until they are available several years later. Dr. Gordon has been a principal investigator in more than 30 pharmaceutical and National Institute of Health sponsored clinical trials and served as key opinion leader/consultant in several retina focused advisory boards and symposia.
